MIND THE GAP

The Marciano Contemporary Gallery is pleased to present the new creations of JOY for the end of Summer 2021. Exhibited in our multiple spaces, we invite you to discover her new works. Her artworks highlighted on an eclectic and unique universe.

JOY is born in France in 1981. Since her childhood she has been attracted to art. She studied Fashion Design and has her work win numerous awards and exhibited in various places. After a few years as a fashion designer and stylist, she decided to devote herself to art, her true passion. She remodeled the tin can, product and universal symbol of our society, thus becoming a bronze sculpture, dressing it in bright colors and multiplying references to pop art and rock culture.

The can, this Neo Pop-Art form becomes the support for his sculptures. The artist is fascinates by the symbol of our modern world, of globalization and American culture. Warhol reproduced it, Caesar compressed it, JOY monumentalizes it.

Inspired by Rock, Pop music, the Urban culture of Street-Art artists and fashion that breaks codes, JOY paints, sprays, colors, draws and glues these icons and images of our modern society.
